

Linssen 45 SL Sedan

Year : 2023

Spacious. More spacious. Most spacious. The Linssen 45 SL motor yacht is the largest yacht in our SL series of sporty displacement yachts. It has an elegant appearance that is particularly suitable for longer cruises with family and friends across Europe. But of course it's also for a long weekend not so far from home.

Anyone looking at the 45 SL motor yacht from the outside will be visually attracted by the anthracite colour accents, the high-quality stainless steel elements and the powerful bow line. They are the eye-catchers in our new SL series. A style in which we make a conscious choice to go for innovation in design, colour and interior.

On board the 45 SL you'll experience the luxury of space. And you'll find plenty of space for luxury. The functional layout and optimum use of the available square metres make every room a comfortable place to be. Everything you need is there and everything you bring from home on your trips can be easily stored.

Our designers paid a lot of attention to the exterior and interior of our SL yacht series. The main features of the interior are its lightness and use of contrasting materials. In the 45 SL it is literally light, because a lot of daylight can enter through the large, continuous saloon windows and various portholes. To create a sporty look, these windows are finished in anthracite on the outside.

The 45 SL is available as an AC version with aft cabin and a Sedan version with a spacious open cockpit. The choice is yours and it's a very personal one.

Length 13m98

Breadth 4m30

Draft 1m20

Air Draft 2.72

Headroom FC/saloon 1.97/2.01

Weight 19500 kg
